

"The human hand, so delicate and so complicated, not only allows the mind to reveal itself but it enables the whole being to enter into special relationships with its environment... man takes possession of his environment with his hands.' His hands, under the guidance of his intellect transform this environment and thus enable him to fulfill his mission in the world."

–Maria Montessori, The Discovery of the Child

Jo's Art Club encourages self-expression and creativity, whilst building confidence and a sense of individual identity. By offering the children a space equipped with a wide selection of materials and mixed media, they can freely express themselves through open ended art activities. Having the opportunity to be creative enables the child to develop critical thinking, whilst being exposed to different perspectives and interpretations of the world, through the work of artists.

Every Thursday, we will explore art techniques and different media, creating our personal visual stories.

"If we try to think back to the dim and distant past... what is it that helps us reconstruct those times, and to picture the lives of those who lived in them? It is their art... It is thanks to the hand, the companion of the mind, that civilization has arisen."

–Maria Montessori, The Absorbent Mind
